## MANAGEMENT DISCUSSION AND ANALYSIS

### ANNEXURE TO DIRECTORS' REPORT

#### Overview:

The purpose of this discussion is to provide an understanding of LYPSA GEMS & JEWELLERY LTD's financial results and business performance by focusing on changes in certain key measures from year to year. This Report includes discussion on the following matters within the limits set by the Company's competitive position:

Diamonds, which for centuries have symbolized love and eternity, are found in some of the world's oldest pieces of jewelry. De Beers drew on that ancient symbolic legacy to make diamond engagement rings a token of romance and lifelong commitment—captured in the memorable catchphrase “a diamond is forever” – and in the process created the modern diamond industry.

#### Indian Overview:

India is a major processing hub for the global jewellery market, owing to its low-cost and highly-skilled labour advantage. According to CARE Research, India is also the world's largest diamond-cutting and polishing centre and second largest gold jewellery centre.

The Indian gems and jewellery market comprises of jewellery (gold and silver), diamonds, coloured stones and pearls. According to CARE Research, Gold and diamond jewellery are the two major segments of the industry globally and India dominates in both of them. Of the total diamonds sold around the world, more than 90% (14 out of 15) diamonds are cut and polished in India (60% by value) because of the low-cost and highly-skilled manpower. Further, India continues to consume and import gold which crossed 850 tonnes per annum (CY2015). The gems and jewellery market is broadly bifurcated as shown in the following chart:

The Gems and Jewellery sector plays a significant role in the Indian economy, contributing to around 6-7 per cent of the country's GDP (Source: CARE Research). India is deemed to be the hub of the global jewellery market because of its low costs and availability of high-skilled labour.

According to CARE Research, the gems and jewellery market in India is home to more than 500,000 players, with the majority being small players. The industry is also highly unorganized dominated by family run jewellers. However, in the recent years there has been a gradual shift to organized players, at both, a national as well as a regional level. The organized sector accounts for around 28% - 30% of the total market share as per CARE Research. However, an increasing number of large showrooms have quickly gained trust among customers with their diverse products, guarantee for purity and value for money. Driven by these factors, the organized sector is expected to grow at a steady pace and increase its market share in the future. Further, Indian consumers also lay emphasis on branded goods, designs and certification. Demand for studded jewellery has witnessed an upswing in stark contrast to pure gold jewellery purchased in earlier years.

## **Outlook**

It can be said that the prospects of the Indian gems and jewellery market are quite promising due to overall rising disposable incomes and the emergence and growth of innovating selling concepts in this digital era which offer the new age consumers the convenience and quality that they seek. Further, the governments overall policies supporting the industry make for a rather conducive environment for growth.

Key Developments during the year:

In February 2016, the Govt. of India (GOI) announced 1% excise duty on jewellery under the Union Budget 2016-17. As a matter of protest, many jewellers pan-India participated in a strike from March-April 2016.

This resulted in loss of business due to closure of outlets of many jewellers. It also impacted festive purchases of many people who may have delayed their purchases or purchased through modern channels of trade like Shop-in-Shops or through e-Commerce.

In November 2016, due to demonetization our business was impacted for about 3 months in India. However due to good demand overseas there was recovery in sales during that period. In long run it would be favorable for organized players like us. Also, In June 2017, the GST council decided to tax polished diamonds, gold and gold jewellery at 3% and rough diamonds at 0.25% under the Goods and Services

Tax (GST) applicable from 1<sup>st</sup> July 2017. As a unified tax nationally, the GST replaced Value Added Tax (VAT), Excise Duty, Octroi and other duties levied on the sector. As input credit is available under GST, it is expected that there will be a limited impact on the industry. GST is expected to increase compliance and bring all players at par, thus giving an impetus to organized channels of sale. As GST is also expected to help pan-India sale of goods and services under the same framework, it is expected to boost trade and commerce.

## **Company's Goal**

Lypsa intends to become a fully integrated and profitable diamond company in the next few years. We intend to go down the value chain and become closer to the customer through retail diamond and jewelry sales and thereby increase profit margins. We intend to build a well-managed corporate organization with standard processes and controls, competent management and reduced dependency on the promoters to generate revenue – features that are quite unique to Indian diamond companies.

## **Business Model**

Lypsa is in the process of increasing production capacity at its new factory in Navsari, Gujarat. The company has acquired a Factory Building and Machineries at Chhapi, Gujarat to expand its manufacturing activities to produce small sized diamonds at affordable cost. This year will see substantial revenue from manufacturing activities. This is in line with our aim of generating maximum revenue from the manufacturing activities that allows higher value-addition than the trading activities.

In house manufacturing reduces the variance in cutting standards and allows the steady production of a high quality standard product, which is valued higher by traders, jewelers and consumers. It also safeguards against the possibility of theft and malpractice, which are a common occurrence in outsourced diamond production.

### **Lypsa's position in the Diamond Value Chain**

The core activity of Lypsa is cutting and polishing of rough diamonds to convert them into finished stones that can be sold to traders and jewelers. Apart from this, Lypsa also sells rough diamonds in the open market that it procures from its sources if it feels that the profit on rough diamond sale is going to be larger than when post-processing. Thus, Lypsa is present in the stages from Rough Diamond Sales to Polished Diamond Sales. As stated above, these activities enjoy relatively lower profit margins than retailing and production. Acknowledging this, Lypsa has decided to expand into the retail segment through a foray into jewellery which will allow high profit margins.

At the end of the year, we expect the launch of the jewelry venture.

Increasing production capacity has been proposed through expansion of the current facility and setting up of a new factory in Gujarat. A program has been initiated to cut down manufacturing costs without compromising on quality.

Setting up of an R&D unit is also on the cards to develop unique diamond cuts. These cuts will be proprietary to Lypsa and will be marketed to retailers.

In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also

## **LYPSA GEMS & JEWELLERY LIMITED**

### **SCHEDULE '25' OF NOTES ON ACCOUNTS ANNEXED TO & FORMING PART OF BALANCE SHEET AS ON 31/03/2018**

#### **1. SIGNIFICANT ACCOUNTING POLICIES**

##### **a) Basis of preparation of financial statements**

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) as a going concern, under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed by the Accounting Standards notified by the Central Government and the provisions of Section 2(2) of the Companies Act, 2013. Accounting policies have been consistently applied from one period to the other except otherwise stated.

##### **b) Use of estimates**

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include provisions for doubtful debts, income taxes and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made.

##### **c) Revenue recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

##### **d) Employee benefits**

Expenses and liabilities in respect of employee benefits are recorded in accordance with the Accounting Standard 15 "Employee Benefits".

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets relating to timing differences are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

**f) Provisions and contingencies**

The Company creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may be, but probably will not, require an outflow of resources. These will not be charged to the Profit & Loss Account as it is not probable that future events will confirm that an asset has been impaired or a liability has been incurred as at the balance sheet date. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

**Notes to accounts:**
